

Human Resources

The success of any organization relies on the collective efforts of its employees. At Camden County Public Service Authority, the Human Resources department plays a vital role in providing employees with a work environment that enables them to efficiently deliver quality services to citizens. The department strategizes, coordinates, and oversees the CCPSA's comprehensive human resources program, which includes fostering positive relationships among employees, conducting training to improve skills, performance, and job satisfaction, and implementing programs to enhance organizational effectiveness. By collaborating with the leadership team, they attract and retain a talented and diverse workforce, maintain efficient HR systems, and develop and deliver competitive benefit, wellness, and compensation programs for CCPSA's employees. At CCPSA, we understand the importance of investing in our employees, and our HR department is devoted to aiding them in reaching their full potential.
